<p>Summary: The use of cleaners/disinfectants which contain quaternary ammonium have demonstrated negative effects on plastics used in the VSM 300.</p> <p>The product noted in this bulletin:</p> <ul style="list-style-type: none"> • Is not compatible with quaternary ammonium based cleaner disinfectants. • Is compatible with warm water and a mild detergent or appropriately diluted, nonstaining disinfectant solution as described in the Vital Signs Monitor 300 Series Directions for Use. <p>This communication is to make you aware of our finding. Our investigation has revealed that the active ingredient of quaternary ammonium found in certain wipe products can cause the plastic to become brittle and fracture when stress is applied. These</p>
