

Extend Your Peace of Mind

Welch Allyn Extended Warranty Programmes

Welch Allyn extended warranty programmes are designed to maximise the availability of your Welch Allyn devices and give you peace of mind that they will always be available when you need them. With an extended warranty, you can continue to benefit from dependable manufacturer protection for a far longer period than the standard warranty provides. In the event your device fails to perform as specified (with the exception of misuse or damage) Welch Allyn will repair or replace it at no cost to you.

Why You Should Consider an Extended Warranty

- > A cost-effective, long-term solution for assuring increased uptime of your devices
- > Eliminates financial surprises thanks to coverage against device failure
- > High-quality, manufacturer grade repairs by Welch Allyn certified technicians
- > Extend your warranty 1, 2 or 5 years beyond the standard coverage period

See Reverse side for the warranty extensions available on each applicable Welch Allyn device.
